

The MagStrainer™ Compound Pressure Gauge features dual output readings for PSI and ft.HD (feet of head). In addition to providing an accurate pressure reading, this gauge is equally as accurate for measuring vacuum (negative pressure). An indication of vacuum can help diagnose poor system performance and also avoid costly downtime due to cavitating pumps, broken seals, and more.

Specifications:

- Dial Size: 4 Inch
- Connection Type: Double Threaded Brass Connection, 1/2 Inch MNPT, 1/4 FNPT
- Connection Location: Bottom
- Body Material: 304 Stainless Steel
- Internals: Brass
- Dry gauge
- Accuracy: $\pm 1.5\%$
